SUMMARY

Results-driven Computer Science undergraduate with hands-on experience in DevOps, cloud infrastructure, and AI-powered application development. Proficient in designing CI/CD pipelines, containerized deployments, and serverless architectures on AWS. Demonstrated ability to build full-stack AI applications using FastAPI, React.js, and Large Language Models. Passionate about automating workflows and building scalable, intelligent systems.

EXPERIENCE

Intern

June 2026 ? July 2026

L&T Construction

? Developed a full-stack RAG (Retrieval-Augmented Generation) application featuring semantic search capabilities and a persistent FAISS vector search pipeline

? Engineered a layered backend using FastAPI and integrated Azure AI Foundry services with a responsive Angular frontend

? Migrated database queries to SQL Server Stored Procedures using T-SQL and implemented a Repository Pattern architecture for optimized data access

? Implemented JWT-based authentication and role-based access control along with an admin dashboard

DevOps Intern

Jan 2026 ? Mar 2026

Internship Studio

? Designed and implemented CI/CD pipelines using Jenkins and Docker, automating build, test, and release workflows to reduce deployment time and errors

? Deployed and managed serverless applications on AWS Lambda and configured cloud infrastructure using Amazon Web Services (AWS), improving scalability and reducing operational overhead

? Containerized and orchestrated applications using Docker and Kubernetes, ensuring high availability and consistent deployment across environments

? Automated infrastructure provisioning and monitoring tasks, improving system reliability by streamlining DevOps workflows and reducing manual intervention

? Assisted in log analysis and incident response, contributing to faster issue detection and resolution in production environments

PROJECTS

RepoScope

AI-powered repository intelligence platform

? Developed an AI-powered repository intelligence platform that analyzes software repositories to deliver architecture insights, semantic code search, automated documentation, dependency visualization, and security analysis

? Engineered backend using FastAPI and integrated Large Language Models (LLMs) for semantic search and intelligent code understanding

? Built an interactive frontend with React.js, enabling developers to visualize codebase structure and security vulnerabilities in real time

Argus

AI-powered DevOps Copilot

? Built an AI-powered DevOps Copilot for intelligent infrastructure monitoring, automated log analysis, CI/CD pipeline assistance, and incident management

? Integrated LLM-based automation with FastAPI backend to enable real-time anomaly detection and automated incident resolution, reducing mean time to resolution (MTTR)

? Deployed using Kubernetes and Docker for scalable containerized infrastructure with a responsive React.js dashboard

EDUCATION

Bachelor of Technology - Computer Science and Engineering

2024 ? Present

SRM Institute of Science and Technology, Kattankulathur

CGPA: 8.0 / 10

Higher Secondary (Class XII)

Completed 2024

Parampara Academy, Arakkonam

Secondary School (Class X)

Completed 2022

Parampara Academy, Arakkonam

SKILLS

Languages: Tamil, Telugu, English, Hindi

Programming: Python, JavaScript, HTML, CSS

Cloud & DevOps: AWS, AWS Lambda, Docker, Kubernetes, Jenkins, CI/CD Pipelines

Backend & AI: FastAPI, Large Language Models (LLMs), Git

Frontend: React.js, CSS, HTML, JavaScript
